ZAHORANSKY given the 2016 MSG Award

The MSG (Munich Strategy Group) has determined and selected the Top 100 medium-sized companies for seven consecutive years. In 2016, the ZAHORANSKY AG with its headquarters in Todtnau was chosen to be part of this selective group, i.e. the Top 100 medium-sized companies.

ZAHORANSKY attained the award having been selected from a pool of 3,500 medium-sized companies. The MSG's "Top 100" ranking exclusively includes companies whose records show a sustainably positive development across an evaluation period of five years. An above-average turnover growth throughout this period is a prerequisite in order to become one of the leaders. This is where the ZAHORANSKY GROUP was able to score points.

The number of incoming orders at the ZAHORANSKY GROUP has continuously achieved record levels over the past three years. In 2016 another record was attained with an incoming order value of approx. 92 million EUR compared to 82 and 85 million in the previous years.

ZAHORANSKY is a leading global manufacturer of brush machines. They range from machines for making toothbrushes and various household brushes all the way through to brushes for the industrial sector. Further business divisions include packaging machines and mould making for injection moulds in the plastics industry.

MSG, a Management consulting company based in Munich, specialises in advising leading medium-sized companies in matters of strategy and growth. MSG's clients include medium-sized companies that are active on a national and international level in the mechanical engineering, food, packaging and construction industries.
